Pedro del Hierro

RELICS

Pedro del Hierro and Opticalia present **Relics**, a collection that celebrates craftsmanship, meticulous detail, and the value of pieces with history. In a context dominated by digital technology, this proposal reinterprets luxury from an authentic, grounded perspective.

Inspired by jewellery, the collection stands out for its metallic finishes and materials that evoke a refined aesthetic. The women's line features a pearlescent temple with spring-like touches, divided by a metal piece that adds a note of distinction. The colour palette is cheerful and bright, with pearly tones that bring freshness and sophistication.

The men's models take a more understated approach, with tortoiseshell hues and transitions from crystal to solid, maintaining a timeless elegance.

Sunglasses complete the collection with pearlescent materials, gradient lenses, functional clips, and acetate frames, blending design and functionality with a decorative touch.
